DETAILED ACTION

Summary

On October 19, 2004, an Office Action was mailed to the Applicant's rejecting claims 1-54 and 56-78. On February 2, 2005, the Applicant responded with arguments.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-54 and 56-78 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boyce (5,899,939) in view of Boyd (6,206,923), as set forth in the previous Office Action.

Response to Arguments

Applicant's arguments filed February 2, 2005 have been fully considered but they are not persuasive. The Applicant argues that Boyce does not disclose or suggest a substantially tubular member or substantially circular, annular, or ring-shaped members.

Art Unit: 3624

In response, Boyce discloses that bone-derived implants may be made of any desirable size and/or configuration (col.4, lines 45-52) and that the implant may take on a cylindrical (tubular) shape (col.6, lines 1-20). Further, the shape of the implant being one of tubular, circular, annular, or ring-shaped is not a novel feature; therefore, the Examiner is interpreting Boyce as reading onto the invention substantially as claimed.

With regard to Boyd, the Applicant argues that Boyd does not teach a ring-shaped member, and the member that is disclosed is a single femoral ring, not a multi-member implant in which the members are substantially tubular, circular, annular, or ring-shaped. In response, regardless of whether the shape taught by Boyd is a multi-member implant, a ring-shaped bone implant is still disclosed (col.6, lines 10-20). Again, shape of the implant being one of tubular, circular, annular, or ring-shaped is not a novel feature; therefore, the Examiner is interpreting Boyd as reading onto the invention substantially as claimed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
